Objective

Computer Science undergraduate with hands-on experience in **Full Stack Development**. Skilled in building responsive web applications and **RESTful APIs** using React.js, Node.js, Express.js, and SQL. Experienced in frontend-backend integration, database management, and software development, with a strong foundation in problem-solving and Object-Oriented Programming.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Frontend Development:** React.js, HTML, CSS
- **Backend Development:** Node.js, Express.js, RESTful APIs
- **Databases:** MySQL, MongoDB, PostgreSQL, SQLite
- **Tools & Technologies:** Git, GitHub, Docker, Prisma, UiPath
- **Core Subjects:** Object-Oriented Programming (OOP), DBMS

Work Experience

Full Stack Developer Intern, Unified Mentors **Jul 2025 – Oct 2025**

- Developed full-stack web application features using React.js, Node.js, and SQL, integrating frontend components with backend business logic and database operations.
- Built responsive user interfaces and integrated RESTful APIs to enable data exchange between frontend components and backend services.
- Used Git and GitHub for version control, collaborated on development tasks, and debugged application issues to improve functionality and reliability.
- Collaborated with team members to understand project requirements, implement application features, and contribute to the software development lifecycle.

Projects

- **AI-Powered Resume Analyzer & Job Match Assistant** – Developed a full-stack AI application using React.js, Node.js, Express.js, Gemini API, Prisma, and SQLite to evaluate resume-job compatibility and generate ATS insights, skill-gap analysis, resume improvement suggestions, and interview recommendations. Implemented PDF parsing, RESTful APIs, structured AI responses, and weighted scoring to assess candidate-job alignment.
- **Women's Health AI – Clinical Risk Prediction & Decision Support System** – Developed a Python and Streamlit-based machine learning application to estimate risks across 8 health conditions using Random Forest and XGBoost models. Implemented data preprocessing, model evaluation, and SHAP-based explainable AI to interpret predictions and help users explore relevant risk factors through an interactive decision-support interface.
- **TeamFlow – Project Management & Collaboration Platform** – Developed a full-stack project management application using React.js, Node.js, Express.js, PostgreSQL, and Prisma to support project planning, task assignment, and progress tracking. Implemented user authentication, role-based access control, RESTful APIs, and dashboard analytics to organize team activities and monitor task statuses.

Education

Bachelor of Engineering in Computer Science, BNM Institute of Technology **2023 – 2027**

CGPA: 8.76/10

Certifications

- Sigma Prime Certification (Full Stack Development) – Apna College
- Full Stack Development Internship – Unified Mentors
- Java Programming Course – KnowledgeGate

Languages

English (Fluent), Kannada (Fluent), Hindi (Basic)
